```
public class Sum of Three Numbers {  
    public static void main (String [] args) {  
        int num1 = 3, num2 = 9, num3 = 10, result;  
        result = num1 + num2 + num3  
    }  
}
```

System.out.println("The result after addition is" + result);

}
}

```
1 import java.util.Scanner;
2
3 public class SumOfThreeNumbers{
4     public static void main(String[] args){
5         int num1=3,num2=9,num3=10,result;
6         result=num1+num2+num3;
7         System.out.println("The result after addition is "+result);
8     }
9 }
```

```
$javac SumOfThreeNumbers.java
```

```
$java -Xmx128M -Xms16M SumOfThreeNumbers
```

```
The result after addition is 22
```
